An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert Richards on 9/30/04.

The application has been amended as follows:

IN THE CLAIMS

In claim 64, as set forth in the 9/23/04 paper, the status identifier was changed from "(New)" to – (Previously presented) –.<sup>1</sup>

The following is an examiner's statement of reasons for allowance:

The examiner agrees that after sintering, binder would no longer be present. USP 3545622 describes a molded block filter comprising an epoxy resin binder, but no bone charcoal, apatite, or hydroxyapatite is described. The block filter, used to dry fluorocarbon refrigerant of water, fails to suggest incorporation of apatite or bone charcoal or the like to the refrigerant block filter. The reference also describes advantages of using molded block filters rather than packed beds of loose particles. USP 5118655 to Pedersen discusses microbial decontamination of aqueous streams using apatite and discusses the molded filter block comprising binder and filtering

<sup>1</sup> Claim 64 was added as a new claim on October 20, 2003.

particles of USP 3545622, but does not suggest making an apatite / binder molded filter block. USP 3662893 is cited as example of a non-sintered molded binder/particle filter block used to filter "a fluid," but does not suggest that the block comprise apatite. USP 5681447 to Maycock describes decontamination of brine solutions using apatite in a packed bed column, but does not suggest forming rigid molded filter blocks from apatite and a binder.

In short, Although numerous prior art water filtration patents and publications describe filtration of water with apatite or the like, for a number of reasons, those references do not suggest formation of the loose powder into a molded block of apatite particles held together by non-sintered binder, resin, or the like.

Accordingly, claims 63 – 64 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
